LeetCode: [Syed_Abdul_Basith14](https://leetcode.com/Syed_Abdul_Basith14)

EDUCATION

- **Siddaganga Institute Of Technology** Tumakuru, Karnataka
B.E. in Information Science & Engineering; CGPA: 9.46/10 2023 – Present
- **Sri Chaitanya PU College** City, State
Higher Secondary Education; Percentage: 92% 2022

AURORA TREASURY – CLUB EXPENSE MANAGEMENT SYSTEM

[\[LIVE LINK\]](#)

- Designed, developed, and **successfully deployed AuroraTreasury**, a production-ready **MERN-based club expense management system** for end-to-end financial tracking and fund management.
- Implemented key features such as **group-fund submissions**, **reimbursement workflows**, detailed payment logs, and **secure role-based authentication** to ensure transparent and reliable financial operations.
- **Actively used by 60+ regular users**, digitizing the club's manual expense workflow into a scalable, accurate, and maintainable real-world financial platform.

PHISHING URL DETECTION SYSTEM (MERN + MACHINE LEARNING)

[\[GITHUB\]](#)

- Developed a phishing URL detection system using Python, FastAPI, and a Random Forest classifier, incorporating URL-based feature engineering such as entropy, lexical pattern analysis, and subdomain characteristics for effective threat identification.
- Built a secure Node.js–Express backend for URL validation, ML inference routing, prediction logging, and service health monitoring, ensuring seamless integration between the ML model and the web system.
- Improved model reliability by removing duplicate samples, preventing data leakage, applying stratified train-test splits, and tuning hyperparameters to achieve stable and realistic performance.

PATIENT-CENTRIC SUMMARIZATION OF RADIOLOGY

[\[GITHUB\]](#)

- Developed a patient-centric NLP tool using Python and NLTK to convert complex radiology reports into simplified, layman-friendly summaries for improved accessibility.
- Implemented a custom medical terminology mapping system covering anatomy, symptoms, findings, and scan procedures to enhance translation accuracy.
- Applied core NLP techniques such as **tokenization**, **stopword removal**, and **lemmatization** to preprocess medical text and improve readability for non-technical users.

TECHNICAL SKILLS

- **Languages:** C, C++, JavaScript
- **Web Technology:** Node.js, Express, React.js, Postman, CSS, HTML
- **DataBase:** MongoDB, SQL
- **CS Fundamentals:** OOPS, DSA, OS
- **Developer Tools:** Git, GitHub

ACHIEVEMENTS

- **Coding Competition** — Secured **2nd place** in a coding competition hosted by Vidyavardhaka College of Engineering, Mysuru. ([Certificate](#))
- **Hackathons** — Secured **3rd place** in a Pitchathon — ranked among the **Top 5 teams** in the IEEE-Photonics Hackathon — achieved **Top 10** position in the college-level Smart India Hackathon.

EXTRACURRICULAR ACTIVITIES

- **Vice President, Club Aurora** — Official dramatics and performing arts club of SIT (2025–26); led club operations, coordinated theatrical productions, and mentored performing teams.
- **Theatre Achievements** — Secured **1st place** in street play (Halcyon 2025), **2nd place** in street play (Halcyon 2024), and **3rd place** in mime at **IIT Madras 2024**; also anchored Aurora's annual event **Shabd Sangam** in 2024 and 2025.
